- Aesthetic transformation:
  - New materials
  - New FUSION operating panel
  - New IMPULSE pushbutton
  - New lighting systems

► Extensive range of finishes available for operating panels, walls, flooring and ceilings

► Use of 100% recyclable material: minimum environmental impact

► Advantages for users: less noise inside the car, more space and interaction thanks to the LCD and TFT display

► With **CarDesigner** design your car wherever and whenever you want

Just imagine your perfect car and we'll do the rest

CARevolution

PETER-LIFT CARevolution

## Car design and building design a perfect fit

A car tailored to your needs

At Lifts, we want to make your life easier. That's why we provide you with all the tools necessary for the design of your car to be a perfect fit with the design of your building. No more restrictions, no more looking through lots of options and models which don't fit in with your designs.

Now all you have to do is choose a car range and then design your car. You can choose from our many finishes and combine them as you want.

The car of your imagination, within your reach

## ■ You yourself design the car for your lift

We present you with a new tool with infinite possibilities

Now, configuring and viewing the car you want will be very simple.

We provide you with everything you need to design a car tailored to your needs.

The new range of CARevolution cars allows you to quickly and intuitively customise the various finishes available, view the configuration chosen, save, print, send by email and ask for more information on the resulting car.

An online tool which can be run on any web browser or mobile or desktop device and is optimised for use on tablets.

Wherever and whenever you want

## ■ The Revolution of Ecodesign NATURALLY tailored to all styles

Life-cycle assessment, applying ISO standards 14040-14044 and CML-2001 and Eco-indicator methods

Minimum environmental impact

Use of 100% recyclable material

We have used the most up-to-date ECODESIGN methods available on the market for the new MP CARevolution passenger car, right from the conceptual design phase.

For this purpose, a rigorous and detailed **life-cycle assessment** has been done, applying **ISO standards 14040-14044** (in its compulsory phase) and methods CML-2001 and Eco-indicator 99 (in its optional phases).

The result of this process is a product with **minimum environmental impact**, this being supported by the use of materials which completely respect the environment and are **100% recyclable**, the optimisation and simplification of manufacturing processes, the use of highly efficient lighting and signalling technology and a significant optimisation in terms of its weight, this directly bringing about a reduction in energy consumption by the lift over its service life.

**Eco-efficient design tailored to your needs**

Assembly and maintenance made easier

Countless advantages for users

#### FLOORING

Greater regulation during construction, meaning adaptation to any lift shaft.

Hinged **OPERATING PANEL** which can be easily accessed for maintenance work.

**LED LIGHTING** with a two-year guaranteed service life, meaning less maintenance work.

#### WALL PANELS

Optimisation of assembly times thanks to a reduction in weight and to new fixtures.

Integration with **MP ecoGO CONTROLLER**. Pre-wired and with plug, making connecting the lighting easier.

**LESS NOISE** inside the car thanks to vibroacoustic car wall panels.

**OPTIMISATION OF THE USEFUL HEIGHT INSIDE THE CAR** thanks to new lighting concepts.

**LESS NOISE** inside the car, meaning greater comfort.

**MORE INFORMATION FOR USERS** thanks to the TFT display.

**OPTIMISATION OF THE CAR'S USEFUL AREA.** Reduction in the thickness of walls.

The photos of finishes shown in this catalogue may differ slightly from the actual material used.
